

Perform the following Operations

1. Create a Subscription Page with its corresponding url and view function as shown below.

```
Blog_Project > Blog_app > models.py > Post
1  from django.db import models
2  from django.contrib.auth.models import User
3
4
5  class Author(models.Model):
6      user = models.OneToOneField(User, on_delete=models.CASCADE, related_name='author_profile')
7      authorname = models.CharField(max_length=100, unique=True)
8
9      def __str__(self):
10         return self.authorname
11
12
13  class Post(models.Model):
14      author = models.ForeignKey(Author, on_delete=models.CASCADE, related_name='posts')
15      title = models.CharField(max_length=200)
16      content = models.TextField()
17      created_at = models.DateTimeField(auto_now_add=True)
18      updated_at = models.DateTimeField(auto_now=True)
19
20      def __str__(self):
21         return self.title
22
23
24  class Subscription(models.Model):
25      PLAN_CHOICES = [
26          ('Basic', 'Basic'),
27          ('Standard', 'Standard'),
28          ('Premium', 'Premium'),
29      ]
30
31      user = models.OneToOneField(User, on_delete=models.CASCADE, related_name='subscription')
32      plan = models.CharField(max_length=10, choices=PLAN_CHOICES, default='Basic')
33      start_date = models.DateTimeField(auto_now_add=True)
34      end_date = models.DateTimeField(null=True, blank=True)
35
36      def __str__(self):
37         return f"{self.user.username} - {self.plan}"
```

```
109 def subscription(request):
110     if not request.user.is_authenticated:
111         return redirect('signin')
112     user = request.user
113     subscription, created = Subscription.objects.get_or_create(user=user)
114     plans = [
115         {'id': 'Basic', 'name': 'Basic', 'features': '3 posts per day', 'price': 100},
116         {'id': 'Standard', 'name': 'Standard', 'features': '10 posts per day', 'price': 500},
117         {'id': 'Premium', 'name': 'Premium', 'features': 'Unlimited posts per day', 'price': 1000},
118     ]
119     return render(request, 'subscription.html', {
120         'plans': plans,
121         'subscription': subscription,
122     })
123
124
125
```

```
17  from django.contrib import admin
18  from django.urls import path
19  from Blog_app import views
20
21  urlpatterns = [
22      path('admin/', admin.site.urls),
